Welcome Screen

```javascript
// WelcomeScreen.js
import React from 'react';
import { View, Text, Button, StyleSheet } from 'react-native';

export default function WelcomeScreen() {
  return (
    <View style={styles.container}>
      <Text style={styles.title}>Enter location manually</Text>
      <Button title="Auto detect my location" onPress={() => {}} />
      <Button title="Manually set my location" onPress={() => {}} />
      <Text style={styles.note}>No internet Connection</Text>
      <Button title="Try Again" onPress={() => {}} />
    </View>
  );
}

const styles = StyleSheet.create({
  container: { flex: 1, alignItems: 'center', justifyContent: 'center' },
  title: { fontSize: 20, fontWeight: 'bold', marginBottom: 20 },
  note: { color: 'red', marginTop: 20 },
});
```

Login Screen

```javascript
// LoginScreen.js
import React from 'react';
import { View, TextInput, Text, Button, StyleSheet } from 'react-native';

export default function LoginScreen() {
  return (
    <View style={styles.container}>
      <Text style={styles.header}>Log In</Text>
      <TextInput placeholder="Email/Phone Number" style={styles.input} />
      <TextInput placeholder="Password" style={styles.input} secureTextEntry />
      <Text>Remember Me</Text>
      <Text style={styles.link}>Forgot Password?</Text>
      <Button title="Log In" onPress={() => {}} />
      <Text style={styles.error}>ERROR: Password Don't Match!</Text>
    </View>
  );
}

const styles = StyleSheet.create({
  container: { padding: 20 },
  header: { fontSize: 24, fontWeight: 'bold', marginBottom: 20 },
  input: { borderBottomWidth: 1, marginBottom: 15 },
  link: { color: 'blue', marginBottom: 20 },
  error: { color: 'red', marginTop: 10 },
});
```

Register Screen

```javascript
// RegisterScreen.js
import React from 'react';
import { View, TextInput, Text, Button, StyleSheet } from 'react-native';

export default function RegisterScreen() {
  return (
    <View style={styles.container}>
      <Text style={styles.header}>Sign Up</Text>
      <TextInput placeholder="First Name" style={styles.input} />
      <TextInput placeholder="Last Name" style={styles.input} />
      <TextInput placeholder="Email" style={styles.input} />
      <TextInput placeholder="Phone Number" style={styles.input} />
      <TextInput placeholder="Set Password" style={styles.input} secureTextEntry />
      <Button title="Register" onPress={() => {}} />
    </View>
  );
}

const styles = StyleSheet.create({
  container: { padding: 20 },
  header: { fontSize: 24, fontWeight: 'bold', marginBottom: 20 },
  input: { borderBottomWidth: 1, marginBottom: 15 },
});
```
